Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 February 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/12/2008 has been entered.

2. Applicant's argument with respect to claims 1-3, 6-8, 12, 17, 18 and 20 are moot in view of new grounds of rejection.
3. Claims 16 and 19 are allowed.

Allowable Subject Matter

4. Claims 4-5, 9-11, 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3, 6-8, 12, 17, 18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over anticipated by Moineau et al., U.S. Patent Application

No. 2004/0215957[hereinafter Moineau in view Applicant Admitted Prior
Art[hereinafter AAPA]

As per claims 1, 8, 17, 18 and 20 Moineau discloses distributed routing device
(26) comprising:

routing unit configured(router 12) to route subscriber traffic flow between at
least two wireless access networks (WLANs 22 and 24) and an IP network
(external network such internet) (see figs 1, 2 and paragraph 0033-0034); and
generating unit (14) configured to generate at least one instance for executing a
security function (i.e., VPN tunnel) on a subscriber traffic flow, so that physically
one security instance for subscribers of at least two wireless access networks is
present and logically at least one of the at least two wireless access networks
has a respective security instance (see paragraph 0041 and 0049).

Moineau is silent regarding: wherein the at least two wireless access networks
correspond to different customer networks

AAPA discloses a router device (AS-1) configured to route subscriber traffic flow
between at least two wireless access networks (C-1 to C-2)) and an IP network
(external network such internet). (see fig. 2 and paragraph 0019). Therefore, it
would have been obvious to one having ordinary skill in the art at the time of the
invention to utilize the access mechanism as taught by AAPA in order to facilitate
centralized customer access network management to ensure secure easier
information management and secure data transfer among the customer access
networks and IP network.

As per claims 2, Moineau discloses the distributed routing device according to claim 1, wherein at least one logical part of the security instance is associated with a context of a respective one of the wireless access networks and comprises an interface with the respective wireless access network(WLAN port 20) (see fig. 2 and paragraph 0051)

As per claim 3. Moineau discloses the distributed routing device according to claim 1, further comprising associating means for associating the subscribers with the at least two wireless access networks (WLAN 22 and 24).

As per claim 6, Moineau discloses the distributed routing device according to claim 1, wherein the security function comprises at least one of a Virtual Private Network, routing and firewall function (see paragraph0044).

As per claim 7, the distributed routing device according to claim 1, wherein the distributed routing device is located at a provider edge of the IP network (see fig. 1, element 26).
